***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 10, 13, 20-22, 1-3, drawn to presentation service, classified in class 709, subclass 203.
  - II. Claims 11, 5-7, drawn to event notification, classified in class 709, subclass 224.
  - III. Claims 4, 8, 12, 14-15, 18-19, 23-26 drawn to protocol conversion, classified in class 709, subclass 230.
  - IV. Claims 16-17 drawn to subscribing/registration system classified in class 709, subclass 223.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as enabling application program interface and presentation server module, for receiving-response presentation; invention II has separate utility such as enabling the system to provide event notification signal for notifying peer network device; invention III has separate utility such as conversing service description to an interface definition and compiling into object module; invention IV has separate utility such as for maintaining registration and supplying the registration information of logical device in a network . See MPEP § 806.05(d).
3. Claim 9 links inventions I, II and III. The restriction requirement between the linked inventions is subject to the non-allowance of the linking claim(s), claim 9. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn

Art Unit: 2143

and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for each of Groups I-IV is not required for each of the other Groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
